

# Delaware enhances online gaming experience

Statewide, DE – The Delaware Lottery Office announced today a number of new enhancements to the internet-based gaming sites available through Delaware Park, Dover Downs, and Harrington Raceway.

MAC users now have access to Delaware's internet casino games. For the first time, they too can experience the fun of blackjack, roulette, and video lottery or "slot machines." All players – both PC and MAC – will be able to enjoy internet casino games without having to first download a Poker application. In addition, four new blackjack games have been added to include multi-hand options. Harrington Raceway has also included two new and exciting video lottery games, Café de Paris and City Life 2.

"The success of internet gaming for the state, the casinos, and players depends on creating a fun and easy experience for everyone," says Secretary of Finance Tom Cook. "We're excited to offer an iGaming option that doesn't require a Poker download, and we're thrilled MAC users can now participate. These enhancements to the technology and to the games themselves allow Delaware to service a whole new segment of players."

Delaware has offered casino games and Poker online since October 2013. Access to internet gaming is available via the following casino websites:
