

Delaware Officials Continue to Monitor Storm-Limited State of Emergency in Sussex County

Governor Jack Markell has declared a Limited State of Emergency in Sussex County, Delaware, effective immediately. State offices will remain open and no driving restrictions have been implemented. Drivers should be aware of localized road closures caused by high winds flooding.

In his Limited State of Emergency declaration, Governor Markell noted that state and local officials are taking the necessary steps to prepare for possible evacuations and road closures, though none have been ordered at this time.

Assets of the Delaware National Guard have been deployed to Kent and Sussex Counties to act in support of local efforts. Governor Markell also reminded residents of flood-prone areas to prepare for possible evacuation and to continue to monitor local media and messages from state and local agencies for updates.

The Delaware Emergency Operations Center is activated with a reduced staff, today, Friday, October 26, 2015; however additional staff are on standby and can be called in if needed. A Coastal Flood Warning will be in effect from 11:00 PM this evening to 7:00 AM Tuesday (October 6).

The National Weather Service says a high impact weather pattern is affecting our region today into Saturday. The main threats are major coastal flooding with heavy surf and beach erosion, as well as very strong winds along Atlantic coastal areas.

Moderate to major coastal flooding is expected today and tomorrow along the Atlantic coast, as well as along the lower Delaware Bay. In addition, moderate coastal flooding is expected on the upper Delaware Bay. Problems caused by coastal flooding are likely to continue into Sunday, but the threat of coastal flooding from Hurricane Joaquin has been greatly reduced by new forecast tracks that show the storm will move further out to sea.

High winds are accompanying our current storm, and winds along the coast tomorrow could gust up to 40-50 MPH. This will impact coastal areas, and moderate flooding is anticipated around the time of tonight's high tide.

The strong northeast winds are expected to continue into at least Saturday, with wind gusts of 25 to 40 mph likely over inland locations, and wind gusts of 45+ mph possible in coastal areas. Additional rainfall of only one half inch to 2 inches is expected.

The Delaware Department of Transportation (DelDOT) says its crews have been working during the past 24 hours to remove debris along roadways, clear storm drains and grates to reduce the potential for flooding, and have placed portable signs in areas where roads are flooded.

DelDOT reports these roads are closed due to flooding:

Sussex County

Primehook Road closed in Milton

River Road closed in Oak Orchard

Front Street closed in Milford

Nanticoke Road – Water on roadway

Turn Point Road – Water on roadway

Inlet Road – Water on roadway

Mercer Avenue in Oak Orchard – Water on roadway
