

DeLDOT Announces Opening of New Christina River Bridge and Approach Roads at Wilmington Riverfront

The Delaware Department of Transportation (DeLDOT) announces that the new Christina River Bridge and approach roads at the Wilmington Riverfront has opened to pedestrian, bicycle, and motor vehicle traffic as of 2:00pm today. The new access roads and bridge improve multimodal traffic flow around the Wilmington Riverfront and provides direct access to Route 13 and the southeastern side of Wilmington.

The nearly \$50 million project, which broke ground in June 2017, includes a 470-foot multi-modal bridge over the Christina River that includes two 12-foot travel lanes and a separated 14-foot wide bicycle and pedestrian path, and more than 1.5 miles of new and improved roads, sidewalks, and parking. The new access road for the Russel W. Peterson Wildlife Refuge will begin construction later this summer.

An opening event will be announced in July.
