

# **Weekly COVID-19 Update – May 7, 2021: New Daily Cases, Hospitalizations, Deaths All Declining in Delaware**

DOVER (May 7, 2021) – The Delaware Division of Public Health (DPH) is providing an update on the most recent statistics related to coronavirus disease 2019 (COVID-19) in Delaware, as of 6 p.m. Thursday, May 6, 2021.

A total of 105,775 positive cases of COVID-19 among Delaware residents have been reported to DPH since March 11, 2020. The seven-day average of new positive cases decreased to 196.7 as of Thursday, May 6.

The seven-day average for the percentage of persons who tested positive for COVID-19 as of Thursday, May 6, was 18.1%, a decrease from 21.1% as of Thursday, April 29. DPH publishes both positivity rates – persons tested and total tests conducted – on its COVID-19 data portal. As of Tuesday, May 4, the seven-day average for the percentage of total tests that were positive was 4.1%, a decrease from 5.1% as of Tuesday, April 27. There is a two-day lag for presenting data related to percent of tests that are positive to account for the time delay between the date of the test and the date that DPH receives the test result.

In addition, 115 individuals are currently hospitalized due to COVID-19 in Delaware, down 51 from this time last week. Twelve of the hospitalized persons are critically ill, down three from last week.

A total of 1,629 Delawareans have passed away due to complications from COVID-19. The state reported four additional deaths since last week's update. The total number

of individuals who have died from COVID-19 range in age from younger than 5 to 104 years old. Of those who have died, 816 were female and 813 were male. A total of 809 individuals were from New Castle County, 336 were from Kent County, and 484 were from Sussex County.

**Update on COVID-19 Variant Cases in Delaware:**

To date, the Division of Public Health has identified the following COVID-19 variants in Delaware through routine surveillance of test specimens. These variants are based on the Centers for Disease Control and Prevention (CDC) list of Variants of Concern and Variants of Interest.

Variants of Concern			Variants of Interest					
Variant	Origin	# of Cases	Variant	Origin	# of Cases			
B.1.1.7	United Kingdom	432	B.1.525	New York, US	2			
B.1.351	South Africa	1	B.1.526	New York, US	195			
B.1.427	California, US	9	<table border="1" style="width: 100%;"> <tr> <td>B.1.526.1</td> <td>New York, US</td> <td>18</td> </tr> </table>			B.1.526.1	New York, US	18
B.1.526.1	New York, US	18						
B.1.429	California, US	11						
P.1	Brazil	15						

In aggregate, the cases include 576 adults ranging in age from 18-98, as well as 107 individuals under the age of 18. A total of 528 individuals were from New Castle County, 99 were from Kent County and 56 were from Sussex County.

The Delaware Public Health Laboratory has sequenced 2,039 specimens for COVID-19 variant strains to date, including 221 within the past week.

Virus mutation is common. Public health approach and treatments are currently not any different, but as these

variants may be more contagious, it is even more important that individuals remain vigilant and continue taking the necessary steps to avoid spreading the virus – wear a mask, wash your hands, avoid gatherings.

For more information regarding CDC variant classifications, visit

<https://www.cdc.gov/coronavirus/2019-ncov/cases-updates/variant-surveillance/variant-info.html>.

### **COVID-19 Vaccinations:**

As of 12:01 a.m. May 7, a total of 793,148 administered doses of the COVID-19 vaccine have been reported to the state's immunization information system, DelVAX. A total of 740,640 doses have been delivered to the state, and 261,545 doses have been delivered as part of the federal provider programs.

More than 423,00 Delaware residents ages 16 and older have received at least one dose of the COVID-19 vaccine, representing 54.5% of the currently eligible population in the state. More than 322,000 have been fully vaccinated, representing 41.5% of the currently eligible population.

Delaware's latest COVID-19 vaccination statistics can be found under the Vaccine Tracker dashboard at [de.gov/healthycommunity](https://de.gov/healthycommunity). For the latest information on the COVID-19 vaccine and the vaccination rollout in Delaware, visit [de.gov/covidvaccine](https://de.gov/covidvaccine).

### **Long-term Care Statistics:**

As of 6:00 p.m. Thursday, May 6, there have been a total of 2,722 positive COVID-19 cases involving long-term care residents, and 747 residents of Delaware long-term care facilities have died from complications related to COVID-19.

The locations and number of deaths involving residents of long-term care facilities are:

Atlantic Shores Rehabilitation and Health Center, Millsboro (25)

Brackenville Center, Genesis Healthcare, Hockessin (23)

Brandywine Nursing and Rehabilitation Center, Wilmington (37)

Brandywine Living at Seaside Pointe, Rehoboth Beach (5)

Brookdale Dover, Dover (15)

Cadia Healthcare Broadmeadow, Middletown (17)

Cadia Healthcare Capitol, Dover (22)

Cadia Healthcare Renaissance, Millsboro (14)

Cadia Healthcare North Wilmington/Silverside, Wilmington (33)

Cadia Healthcare Pike Creek, Pike Creek (3)

Churchman Village, Newark (22)

Country Rest Home, Greenwood (17)

Delaware Hospital for the Chronically Ill, Smyrna (15)

Delmar Nursing and Rehabilitation Center in Delmar (2)

Dover Place, Dover (7)

Foulk Manor South, Wilmington (15)

Forwood Manor, Wilmington (10)

Governor Bacon Health Center, Delaware City (1)

HarborChase of Wilmington, Wilmington (4)

Harbor Healthcare and Rehabilitation, Lewes (46)

Harrison House Senior Living, Georgetown (48)

Hillside Center, Wilmington (9)

Ingleside Assisted Living, Wilmington (4)

Kentmere Rehabilitation and Healthcare Center, Wilmington (9)

Kutz Senior Living, Wilmington (10)

Little Sisters of the Poor, Newark (11)

WillowBrooke Court at Cokesbury Village, Hockessin (4)

Five other New Castle County long-term care facilities (1 death at each facility)

One other Sussex County long-term care facility (1 death at this facility)

If you are sick with any of the following symptoms, stay home: fever, cough, shortness of breath, sore throat, muscle aches, fatigue, chills, shaking with chills, loss of smell or taste, nausea or vomiting, diarrhea, or headache or congestion or runny nose without a known cause such as allergies. Other symptoms such as abdominal pain or lack of appetite have been identified as potential symptoms related to COVID-19 and may prompt further screening, action or investigation by a primary care provider. If you are sick and need essential supplies, ask someone else to go to the grocery store or the pharmacy to get what you need.

DPH reminds Delawareans that if you believe you have been exposed to someone with COVID-19, or have symptoms of illness, make sure to distance yourself from others, particularly vulnerable populations. Older adults and people of any age with serious underlying medical conditions – including serious

heart conditions, chronic lung conditions, including moderate to severe asthma, severe obesity and those who are immunocompromised, including through cancer treatment – may have a higher risk for severe illness from COVID-19.

Information about testing events, including community testing sites, permanent fixed testing sites, and free-standing sites operated by the health care systems and hospitals, will be listed on the testing section of the Delaware coronavirus website at [de.gov/gettested](https://de.gov/gettested).

Delawareans 18 or older are encouraged to download COVID Alert DE, Delaware's free exposure notification app to help protect your neighbors while ensuring your privacy. Download on the App Store or Google Play.

Individuals with general questions about COVID-19 should call Delaware 2-1-1, individuals who are deaf or hard of hearing can text their ZIP code to 898-211, or email [delaware211@uwde.org](mailto:delaware211@uwde.org). Hours of operation are 8:00 a.m. to 9:00 p.m. Monday through Friday; 9:00 a.m. to 5:00 p.m. Saturday and Sunday. Medically related questions regarding testing, symptoms, and health-related guidance can be submitted by email at [DPHCall@delaware.gov](mailto:DPHCall@delaware.gov).

Individuals who have complaints about individuals violating public gathering restrictions should contact state or local law enforcement. Concerns that a business may be violating operating restrictions should be directed to: [HSPContact@delaware.gov](mailto:HSPContact@delaware.gov). Questions related to business re-openings or operations as businesses re-open should go to [COVID19FAQ@delaware.gov](mailto:COVID19FAQ@delaware.gov). Questions regarding unemployment claims should be emailed to: [UIClaims@delaware.gov](mailto:UIClaims@delaware.gov).

As a reminder, DPH recently announced it has created a pathway for the public to submit complaints if they believe a COVID-19 vaccination provider is violating vaccination requirements. Those complaints can be directed to [HSPContact@delaware.gov](mailto:HSPContact@delaware.gov).

DPH will continue to update the public as more information becomes available. For the latest on Delaware's response, go to [de.gov/coronavirus](https://de.gov/coronavirus).
